

A Vision of Hope

A Story of Redemption and Purpose

A memoir by Andrew Drasen · Franklin, Wisconsin

From incarceration to inspiration. One man's journey from darkness to purpose, and an invitation into your own path of healing.

Written behind bars and finished minutes before release, A Vision of Hope is Andrew Drasen's unflinching account of nearly two decades lost to addiction and the justice system, and the stubborn hope that finally made change possible. It does not clean up the hard parts. People in recovery see themselves in it. People who have never lived that story come away understanding it, because it puts a human face on a subject that usually gets judgment instead.
